

Paris, May 9<sup>th</sup>, 2017

## SAVE THE NEW DATE

### World Efficiency Solutions now includes additional activities and expects to see you from 12 to 14 December 2017 in Paris

**World Efficiency (WE) Solutions**, the premier international meeting for the low-carbon and resource-efficient economy will take place from **12 to 14 December 2017 in Paris**, instead of 17-19 October as originally announced.

The revised date ensures that WE builds upon developments arising from the World Climate Solutions event in Bonn organised by World Climate Ltd and Reed Exhibitions during COP23.

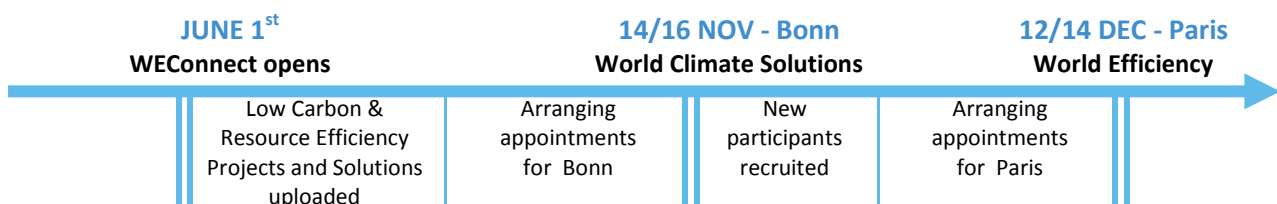

In December, following on from COP23, World Efficiency will be holding its 'ONLINE to On LIFE' event, which will translate Bonn decisions into concrete business and implementation opportunities.

First, the '**WEConnect**' online platform will be operational from June 1<sup>st</sup> to gather and connect low-carbon, resource-efficient projects with potential solution providers.

Then, **World Climate Solutions** (14-16 November in Bonn) will address major financing issues and will facilitate the development of public-private partnerships (PPPs) for the implementation of the NDCs (Nationally Determined Contributions).

Finally, **World Efficiency Solutions**, from 12 to 14 December, will offer its participants an even wider network of international partners through its five dimensions: BUSINESS MATCHMAKING, SUMMIT, EXPO, SHOWCASE and TRAINING.

**In 2017, we thus propose three exceptional events, to create together the market for low-carbon, resource-efficient solutions: see you in Bonn from 14 to 16 November for World Climate Solutions, in Paris from 12 to 14 December for World Efficiency Solutions and from June 1st on WEConnect.**
